Problem Statement
Engineering graduates are not totally aware of all types of job opportunities they can have which results them either unemployed or lands them into the wrong domain.
According to Industry estimates, 15 lakhs engineers graduate in India every year out of which 2.5 lakhs land relevant jobs in technical domains.

User Stories

Title	Description	Priority
Decision making	As a student I want to know list of all career paths possible after my graduation so that I can make the best career choice	High
Lack of awareness	As a student I want to know a career opportunity which goes right with my interests so that I could do the best for myself and as well as for the company I will be working in	High
Build connection	As a student I want a feature to connect to other students	Low
Career in demand	As a student I want to know all career paths with their respective salaries so that I can make the best decision for myself	High

Vision

To build an app which helps engineering graduates to land relevant jobs. This app will show what are the career choices they can make based on their potential and interests.

Proposed Solution

Provide students the relevant data regarding the opportunities in such a way that they can choose the best option for their future.

Proposed Structure and Design

According to the current scope, the proposed design has the following screens:
